

CLIMAS LLC

CLIMATE ADVISORY SERVICES LLC

CLIMATE CHANGE, CLIMATE FINANCE AND
SUSTAINABILITY CONSULTANTS

About Us

Seeking Global Change

Innovation

We are a boutique, innovative, women owned firm that provides consulting and advisory services in climate change, climate finance and sustainability since 2013.

Experienced
team

We have a team of highly trained and experienced multidisciplinary experts who can assist your organization in designing action plans, implementing them, and providing training and capacity building.

Personalized &
effective solutions

Our differentiating factor lies in providing personalized and effective solutions to help address current and future climate challenges and risks.

Climate action

We work in the development of roadmaps for climate action in Latin America and the Caribbean to accelerate the transition to resilient and low-carbon economies in line with the Paris Agreement.

Mission & Vision

Key activities for
low-carbon, climate
resilience
development:

Helping our clients thrive in a changing climate

We focus on strategy development and a array of forms of climate mitigation and adaptation activities for low-carbon, climate-resilient pathways.

We aspire to empower businesses and organizations to proactively address climate challenges, capitalize on climate finance opportunities, and embrace sustainable practices.

- Climate change mitigation, adaptation and resilience.
- Nationally Determined Contribution (NDCs) and climate actions.
- ESG and sustainability strategies and investments.
- Carbon pricing, Carbon Markets (compliance and voluntary) and Article 6.
- Climate finance.
- Climate risks.
- Disruptive technologies (machine learning and remote sensing, and satellite imagery) for climate change projects.
- Knowledge sharing.
- Digital transformation support.

SIX AREAS OF WORK

CARBON MARKETS

OUR TEAM

LUCILA SERRA

Co-Founder & CEO.

Climate Finance and Policy

Accomplished in climate policy, regulation, carbon finance, mitigation and adaptation. +20 years of international experience designing institutional arrangements and implementing climate change related projects, carbon pricing instruments and climate change mitigation and adaptation strategies.

LUCRECIA GIACOMUZZI

Climate Intelligence and Risks

Specialist in disruptive technologies and Climate Change and Risks. Focus on the application of new technologies to address global environmental challenges. Specialist in Law and its applications towards Sustainable Development Goals (SDGs).

CAROLINA GENTILE

ESG, Governance and Compliance

Expert in ESG, governance and compliance to ensure ethical and responsible practices in any organization.

MICAELA CARLINO

Climate Finance

Expert in climate finance and policy supporting organizations in project development and implementation, capacity building and green finance instruments. Focused in Sustainable finance and project assessment consulting.

MARIA DOMINGUEZ

Research and Data Analysis

Climate change and sustainability researcher and data analyst. Specialist in environmental impact assesment.

FLORENCIA PINTO

Sustainability and Communications

Expert in communications and public relations, focused in sustainability, Ambassador of the Latin America Green Awards.

+ Network of consultants on demand

We work with a network of international consultants and experts upon demand, located throughout Latin America and the Caribbean, and on a project-by-project basis.

OUR RECENT PROJECTS

giz

Mitigation Action Facility (MAF) Global (2023)

- Technical Support for the Call of Projects 2023 of the Mitigation Action Facility. Engagement with project concepts and applicants. Review of ambition of project concepts (transformational change, financial ambition, mitigation potential). Identification of regulatory and institutional barriers and gaps. Assessment of gender sensitive potential and social inclusion stakeholder engagement.
- Technical assistance: GIZ - In collaboration with HEAT GmbH.

Green Climate Fund (2020-2023)

- Review of Concept Notes for project financing under the GCF for mitigation and adaptation projects.
- Analysis of data from Concept Notes (CN) submitted to the GCF to identify common issues highlighted by GCF reviewers and provide guidance with lessons learned for Accredited Entities (AEs) in order to enhance the overall submission process, identify knowledge gaps, and offer opportunities for capacity building and climate financing.

Uruguay (2023-2024):

- Technical assistance under the GCF Readiness Program. Support the development of a voluntary emissions reduction program, alongside strengthening the capacities, information, and tools of both the public and private sectors in Uruguay to increase private investment in climate change.
- Executing entity: NDC and GCF.

Peru (2023-2025):

- Technical assistance for ESG and implementation support - National Bank of Peru (COFIDE) Framework Loan, to upgrade COFIDE's ESG policies and procedures (in line with international standards). Support COFIDE in the implementation of EIB's projects to ensure they meet EIB required standards. Support COFIDE in the screening and risk assessment of a new pipeline of sustainable energy projects on ESG and Climate Action aspects.
- Project financed by: European Investment Bank (EIB).
- Technical assistance: NTU.

Dominican Republic (2023-2024)

- Analysis of investment needs and preparation of an investment plan for the 87 adaptation and mitigation measures for the implementation of the NDC of the Dominican Republic.
- Project financed by: IDB.
- Technical assistance: OCA.

OUR RECENT PROJECTS

20th ANIVERSARIO
CENTRARSE
en GUATEMALA

Guatemala (2023)

- Supporting Banco G&T in reviewing and assessing their Environmental and Social Risk Management System (SARAS) in line with the criteria of the IFC's Performance Standards on Environmental and Social Sustainability.
- Technical assistance: CentraRSE.

MARTORANO
CONSTRUCTION INC.

USA (2020-2023)

- Supported projects by gathering accurate environmental data resulted from satellite imagery, machine learning, artificial intelligence and remote sensing for MRV activities.
- Supported green buildings, passive housing and sustainable construction strategies under LEED and EMU certification.

Costa Rica (2020-2024)

- Consulting services to support the National Bank of Costa Rica (BNCR) in the implementation of a climate change/ESG strategy in line with TCFD, development of sustainable finance products in line with the EU/AFD's taxonomy and IDFC Common Principles for climate mitigation finance.
- Identification of dedicated climate funds, financial instruments and donors to support projects in line with the NDC and decarbonization national plan (PND).
- Project funded by: AFD/EU.
- Technical assistance: Ensphere, Steer Davis, Futuris Consulting.

Guatemala (2022)

- Supporting the private sector, financial institutions, insurance and corporations in the implementation of a Sustainable Finance Strategy and the development of the Sustainable Protocol of Guatemala.
- Project funded by: IDB Invest.
- Technical assistance: CentraRSE.

Barbados (2020-2022)

- Supporting activities related to the implementation of Barbados NDC to become a carbon neutral economy by 2030. Conduction of a gap analysis and a climate finance roadmap, identification of a pipeline of mitigation and adaptation activities and measures to scale up investments and climate finance.
- Project funded by: IDB.
- Technical assistance: OQA-EQO.

Argentina (2022)

- Analysis and review of the Digital Transformation Programs funded by SEPYME (SMEs Agency) and the IDB, through the enhancement of RFPs and legal documents to be aligned with the Paris Agreement and climate finance mitigation and adaptation.
- Project funded by: IDB Climate Change and IT Divisions.

OUR RECENT PROJECTS

Indonesia - Global (2021-2022)

- Supporting the PPIAF (Private Infrastructure Advisory Facility) in the establishment of a national framework for the recycling of assets of state-owned enterprises (SOE) by the government of Indonesia to integrate climate resilience, climate risks, climate financing options, sustainable infrastructure, ESG, and environmental sustainability considerations into the General and Indonesia's Guidelines for the Implementation of Limited Concession Schemes (LCS) and PPPs, as well as sectoral guidelines for airports, ports, energy, and Roads (sustainable infrastructure).
- Project funded by: World Bank.

Guatemala (2021)

- Analysis of the climate finance and investments estimations (CAPEX) for mitigation and adaptation measures and actions for the implementation of the updated NDC 2020.
- Project funded by: IDB.

Ecuador (2020-2021)

- Supporting the National Development Bank of Ecuador (BDE) in the implementation of a sustainable strategy to finance green programs and projects post COVID-19; portfolio screening of projects/programs for climate finance opportunities and identification of green products and the development of a climate finance strategy, including the identification of enabling conditions and barriers to become an Accredited Entities (AE) to access GCF resources.
- Project funded by: GIZ - Financing Energy for Low-carbon Investment – Cities Advisory Facility (FELICITY EU).

Suriname (2021)

- Analysis of the climate finance and investments estimations for mitigation and adaptation measures for the implementation of the updated NDC of Suriname.
- Project Funded by: IDB.
- Technical assistance: OCA Global.

Argentina (2020-2021)

- Mapping of national and local laws, regulations and policies, barriers, gaps, for the retrofitting of existing residential buildings through energy efficiency and renewable energy measures for the “Development of a Residential Retrofit Strategy for the City of Buenos Aires” in line with the Paris Agreement, Argentine NDC (2020) and the Carbon Neutral Pledge by 2050.
- Project funded by: C40 Cities Climate Leadership Group.

OUR RECENT PROJECTS

Suriname (2019)

- Preparation of the enhanced Suriname NDC. Implementation activities, such as identification of a pipeline of mitigation and adaptation projects, and investment opportunities.
- Project funded by: IDB.
- Technical assistance: OCA Global.

Guatemala (2018)

- Climate Technology Mechanisms and Networks in LAC (IDB RG-T2384).
- Legal analysis of the energy sector and the technical foundation for the formulation of a fiscal policy that encourages the use of distributed electricity generation from renewable sources in Guatemala.
- Project funded by: IDB.
- Technical assistance: Fundación Bariloche and Factor CO2.

Antigua and Barbuda (2018 & 2014)

- Development of a scoping study and technical feasibility assessment for the transition to Electric Vehicle Mobility.
- Analysis of mitigation and adaptation activities and the building blocks for the implementation of their NDC.
- UNEP-DTU Program Project.

Grenada (2015)

- Technical assistance for the analysis of climate change related policies of Caribbean (SIDS) countries for the development of INDCs under the Paris Agreement to catalyze climate finance and investments through market mechanisms, carbon pricing, results-based finance.
- UNFCCC secretariat and WINDREF Project.

The Bahamas (2015)

- Technical assistance for the analysis of climate change related policies of SIDS countries for the development of INDCs under the Paris Agreement in the energy, water, waste, agriculture and transport sectors to catalyze climate finance and incentives.
- UNFCCC secretariat and WINDREF Project.

IMPACTS AND RESULTS
